1. Executive Summary & Core Insights

This evaluation analyzes full-funnel lead progression from raw website traffic to signed enterprise contracts. The analysis demonstrates an overall **0.558% Visitor-to-Customer conversion yield**. The primary top-of-funnel leak occurs at the **Visitor → Lead transition (93.13% drop-off)**, driven heavily by mobile form friction. The most critical downstream bottleneck exists at **Opportunity → Customer (63.81% drop-off)**, causing over **$12.3M in unrealized ARR leakage**. **Referral / Partner** emerged as the highest-performing channel (**20.48% Lead-to-Customer conversion**, **$49.59 CAC**, and **416x ROAS**), whereas **Paid Search ($2,058 CAC)** and **Social Ads ($6,101 CAC)** exhibited severe capital inefficiency.

4. Actionable Recommendations & Growth Roadmap

1. Triple Down on Referral & Partner Channels (High Impact): Referral delivers 20.48% conversion, $49.59 CAC, and 416x ROAS. Expand integration partnerships and co-marketing webinars to scale share of traffic from 8% to 18% (+ $1.2M ARR).

2. Mobile Landing Page UX Redesign: Mobile conversion lags desktop by 55% (0.331% vs 0.742%). Implement 1-click Google/LinkedIn authentication and reduce form fields to recover ~450 lost leads.

3. Prune Social & Restructure Google Search Ads: Reallocate 60% of underperforming Meta/X ad budget ($6,101 CAC) into LinkedIn ABM campaigns targeting C-level buyers, while focusing Google Ads strictly on exact-match competitor displacement terms.

4. Deal Acceleration & Security Enablement: 63.8% of opportunities drop off at proposal. Implement standardized 48-hour security packs (SOC2/GDPR) and dynamic ROI calculators during demos to compress deal cycles from 37 days down to 22 days.
